

# BRASS AND BRONZE WASHING MACHINE VALVES

## MULTI-TURN APPLIANCE VALVES

CONTROL FLOW TO YOUR WASHING MACHINE

Washing Machine Valves by ProLine Series allow you to easily hook up your water supply to your washing machine and control the flow for maintenance. Built with a brass body and hose thread outlets, this valve will ensure your appliance's secure and water-tight connection. The chrome plating supports corrosion resistance from common detergents and other cleaning materials, further enhancing the lifespan of the valve. For more information, please contact your sales representative to identify the valve that fits your job.

### MULTI-TURN HANDLE

Tee-handle supports ease of operation.

### CHROME-PLATING

Supports corrosion-resistance from common household cleaners.

### BODY TYPE

Assortment of connection types and handle placements.

### APPLICABLE CERTIFICATIONS:
